

What's New in Version 8 compared to Version 7.1

- *Historical V-Dem*

For this version of the dataset we are for the first time including Historical V-Dem. The integration of Historical V-Dem with V-Dem means that many countries have data coverage on numerous V-Dem indicators from 1789 to the present. Historical V-Dem also contains several extra, historical polities that have ceased to exist, such as Bavaria and the Two Sicilies. To find more details about which countries are coded for historical V-Dem please refer to the country table (p. 35 in the codebook) or the *Country Coding Units* document.

Further, Historical V-Dem introduces several new indicators on various institutional features, some of which were particularly relevant for 19th century polities. To find more details on the Historical V-Dem variables please refer to the Historical V-Dem section of the codebook (p. 33).
